

HARISH A

Thirumullaivoyal, Chennai | harisharumugam2005@gmail.com | 6379405973

SUMMARY

A pre-final year Computer Science student passionate about building robust, scalable, and future-ready software solutions. Skilled in requirements analysis, software design, development, and unit testing, with a strong desire to apply these abilities toward advancing cutting-edge inspection and metrology technologies in the industry.

TECHNICAL SKILLS

- **Programming:** C, Java, Python, Dart
- **Frameworks & Tools:** Flutter, Firebase, Git
- **Software Engineering Practices:** API Integration, Data Structures & Algorithms, Unit Testing, Requirements Analysis, UI/UX Design, Azure DevOps

PROFESSIONAL EXPERIENCE

Flutter Developer Intern, ATG Banao Tech

Sep 2025 - Oct 2025

- Worked on AstroVachan, a mobile app delivering personalized Vedic astrology insights and predictions with a clean, user-friendly interface.
- Contributed to Agora chat feature development, bug fixing, and performance optimization to improve overall user experience and engagement.

IOT Trainee, REC Nexus, TANSAM

Jun 2025 - Jul 2025

- Gained hands-on experience with hardware-software integration and real-time data processing, fundamentals relevant to embedded and systems software.

PROJECT EXPERIENCE

Farmezy – Agricultural Marketplace App | Flutter, Firebase

- Performed requirements analysis and software design for a scalable application supporting multiple user roles (farmers, workers, buyers).
- Developed and unit tested independent features to ensure a consistent and robust user experience and data flow.
- Devised solutions for complex problems like real-time price updates and logistics tracking.

PingMe – Smart Academic Reminder & Focus Assistant | Flutter, Firebase, FCM

- Designed and developed a full-featured academic productivity app enabling faculty to push real-time reminders directly to students.
- Implemented full-screen and overlay notifications, focus mode sessions, and distraction detection using background services and system-level overlays to minimize app-switching.
- Integrated Firebase Auth, Firestore, and Cloud Messaging for secure role-based access, instant sync, and scheduled alerts.

Solar Power Output Predictor | Python, Scikit-learn

- Conducted data preprocessing and analysis on time-series sensor data to build a regression model.
- Devised and drove a predictive analysis solution, highlighting its potential for performance optimization.

EDUCATION

Bachelor of Engineering in Computer Science and Design

Sep 2023 - Present

Rajalakshmi Engineering College

- Merging technology and creativity to create innovative, user-centered solutions

ADDITIONAL INFORMATION

- **Languages:** English, Tamil.
- **Awards/Activities:** Top 10 in TN Skills 2025 (State Level), Special Mention Award in Mindspark Ideathon, 3rd place in I'Quest'25 (Departmental Level), Multiple hackathon participant.
- **Projects:** <https://github.com/Harish05A>
